Constants

```java
1 package utils;
2
3 /**
4  * This class contains useful constants
5  *
6  * Authors: Samuel Mayor, Alexandra Korukova
7  */
8 public class Constants {
9     // the name of the remote objects
10     public static final String REMOTE_OBJ_NAME = "ValueManager";
11     // host
12     public static final String SERVER_HOST = "localhost";
13
14     // commands entered by the user
15     public static final char PRINT = 'P';
16     public static final char WRITE = 'W';
17     public static final char QUIT = 'Q';
18     public static final char LOOKUP = 'L';
19
20     // the message to be displayed if the user enters the wrong command
21     public static final String UNKNOWN_COMMAND = "Unknown command";
22 }
23
```
